# THE SPIRIT OF A DISTINGUISHED LINEAGE

*" Our family home is located at the entrance to Riquewihr which is undeniably one of the most beautiful villages of France .*

*Our history is a long one that is deeply rooted in viniculture. We have lived off of wine since 1574.*

*The family tree is always there to remind us not only of where we come from, but most of all where we are going. "*

**Etienne-Arnaud Dopff**

## **Pierre-Etienne**

His determination to modernize and mechanize the production for better precision and efficiency was his contribution to the family.

## **Julien-Pierre**

Has taken up the family's ambition. His land ownership instinct pushed him in the right direction. He expanded the Dopff au Moulin Estate like no one before him.

## **Gustave-Julien**

He was the epitome of audacity and determination. We can say that it was he who invented Crémant. He undertook another initiative by bottling his wines in the slender flute bottles that are still the hallmark of Alsatian wines today.

## Grape grower

with 70 hectares, the Dopff Estate is the most important in the heart of the Grand Cru region. It extends essentially in the Riquewihr area on the south-facing hillside called Schœnenbourg (nice slope), the Riesling terroir par excellence, listed Grand Cru, but also around Hunawihr, Mittelwihr, la Hardt de Colmar and Turckheim as well.

## Winemaker

All Dopff wines are vinified by us, under the responsibility of our cellar master and oenologist. Besides our own Dopff Estate vinifications, we also propose wines vinified by us from selected grapes brought by partner-grape growers.

## Vintner

The actual vintages need some respect, they need time to grow. You must give it time, a long-standing shared secret at Dopff's, in particular for the making of our Crémants, in which we are pioneers, resting on slats for many years according to the different Cuvées.

## Bottler

The bottling is done at the Estate. It represents the final stage as a guarantee for all our customers, wherever they are, of quality and satisfactory wine conservation.

# THE FINENESS OF OUR TERROIRS

*" We are part of the most important owners of the region. That is of paramount importance for the quality of our wines. Our growing methods respect the environment on a global scale and are coherent with our overall philosophy that extends from vine to glass.*

*Day after day, we have acquired high-performance machine tools and we are firmly on the path of quality and sustainable development. It is a matter of common sense. "*
